

Mohit Patel

Full Stack Developer

I am currently a Fourth-year student in the Computer Science Program at Acropolis Institute of Technology and Research with an interest in Web development and exploring new things. I'm a passionate learner with substantial experience in web design and web development who have successfully delivered many projects with complete client satisfaction. I always thrive to learn more and enhance my knowledge to become better.

I'm a firm believer that we should never settle. I'm hard working, super curious, passionate, committed, and also a fast learner.

Work History

2019-02 -
Current

Web Developer, Intern

Zeit Labs Indore, Indore, Madhya Pradesh

• Foreign Admits

About: -

Foreign Admits is a Career Counselling and Abroad Studies Guidance Platform. It helps students to about foreign universities and also to get the University according to their score in different exams. It also helps students to get their Visa and booking the travels. Students can also get counselling from different mentors by booking an appointment.

My Role: -

I have developed the complete backend of the platform using **MVC architecture**. Also, I have to use Razor Pay for the payment of the courses provided. We have the Admi Panel for the platform to add new content for the different sections. It also has google login for the students.

• One Water Academy

About: -

This is the online platform of a non-profit government organization named One Water Academy. This platform was built to provide a user- friendly, and continuous skill-based learning through collaboration and networking. This platform was specifically made for water industry professionals connected to the One Water Academy.

It has three different platforms (Learning, Blog and Video) for the users. In the blog, the author can post the blog which has to be approved by the admin to be available for the user to read and like it. It also has an Admin Panel that tracks all the user's activity and for posting the video.

My Role: -

I have developed the complete backend of the platform using MVC architecture. I have to make to separate authentication for the user and author as they have a separate dashboard with different functions.
